📠 Telegram (@stanislavhohulia) 🔗 My website 🌐 LinkedIn 🐙 GitHub
🛡 Can work during blackouts

Skills

JavaScript (ES6+), TypeScript
Vue.js (Pinia/Vuex), React.js,
Redux, HTML5, CSS3/SCSS
Node.js, Nest.js, Express
PostgreSQL, MySQL
AWS (S3, CloudFront, Lambda,
Cognito), Docker, CI/CD
Git, Sentry, Jira/YouTrack, AI-
assisted development

Languages

English: B2 (Upper-Intermediate),
Ukrainian: Native

Courses

Node.js PRO, *RobotDreams*
01/2026 – Present
Advanced backend engineering
with NestJS, Microservices, and
DevOps practices.

AWS for Front-end, *Fwdays*
Built serverless apps using
Lambda and Cognito with S3/
CloudFront deployment and IAM
security.

Full-Stack Developer,
Mate academy
06/2024 – 10/2024
1000+ hours of intensive PERN
stack and TypeScript coding.

Activities

**Participant, NASA Space Apps
Challenge**
48-hour global hackathon using
NASA open data.

**Head of Student Council,
Student Campus**
Student leader of a 5,000-student
community.

Full-stack Engineer with deep expertise in **Front-end performance and SEO optimization**. In my previous role at a major retail company, I focused on data-driven development, utilizing Sentry for error analysis and implementing architectural changes that significantly **improved core web metrics**.

I don't just write code; I solve business problems. I have **experience in implementing full-cycle projects**: from requirements to scalable infrastructure and maintenance. Combining my **Software Engineering education** with **React.js** or **Vue.js**, **NestJS**, and **AWS**, I develop robust architectures that drive business growth.

Professional Experience

Dnipro-M, *Front-end engineer*
2024 – 2026 | Kiyv, Ukraine

- Optimized frontend architecture and Webpack configurations, improving **Core Web Vitals by 43%** and significantly boosting SEO and user retention.
- Architected a comprehensive, multi-page Help Center that optimizes the user troubleshooting journey, reducing the need for direct support intervention.
- Engineered an advanced search and filtering system that drove a **170% increase in search-to-sale conversion** by streamlining the user journey.
- Re-engineered the localization system with resolving stability issues and ensuring near-instant, transparent language loading for a seamless user experience.

Education

Kyiv Aviation Institute, *Bachelor's*
2022 – 2026 | Kiyv, Ukraine

- Core Principles:** Advanced knowledge of SOLID, Design Patterns, and Clean Code practices.
- Backend & Security:** Hands-on experience with SQL databases and software security protocols.
- Methodologies:** Practical application of Agile/Scrum and full SDLC management.

Projects

Student Service Desk

[Demo] 🔗 Developed and implemented a comprehensive system for automating the submission and processing of applications in a student campus (5,000+ residents).

React, NestJS, PostgreSQL, TypeORM, Redis, Telegram API, Docker, Ubuntu.

Digital Portfolio

[GitHub] 🔗 [Link] 🔗 A high-performance personal portfolio built with modern frontend frameworks and cloud infrastructure

Astro, React, GSAP, AWS (S3, CloudFront, Route 53), GitHub Actions
